Real patient experiences shared on Reddit

“Just got it done today!! Immediately I saw a glow when my cheeks hit the light like glass skin and my pores minimized.. similar to if you wear a primer. I used 2 syringes, one on each side of my cheek.”

“I did it about 4 months ago and am obsessed. I know it’s supposed to last 6 months but I’m getting it again next week because it’s sort of like Botox in the way it slowly wears off. I noticed a considerable improvement in hydrated looking skin but also firmer,fuller overall better textured skin.”

“I got it 3 months ago in cheeks and neck (was starting to get fine lines) and absolutely OBSESSED!!!!”
